Upcoming Bi-Weekly Virtual Program

November 19th, 2020 11:30am-12:30pm CDT Hawk Ridge: Counting for Conservation

Shore of Lake Superior is one of the premier migratory routes for rapto in North America. Hundreds of thousands to millions of birds migrate vimany of them pass directly over Duluth. During migration season, really in Duluth is look up- no matter where you are and you can see birds! We possional flyway? We will explore the background of how this corridor of ces behind such an exceptional migratory corridor. Both fall and spring d annually by Hawk Ridge Observatory with an average of about 90,000 undreds of thousands of other birds. We'll highlight some specific birds adaptations, which birds are most likely to be seen in the Duluth Har research efforts in place at Hawk Ridge, compare Fall and Spring count. It's all for the Birds!
